SUMMARY

Full-stack engineer building TypeScript, React, and Python apps. Sold technical products to IT buyers and cities for five years. Now builds websites with secure authorization, and has the ability to build structured data models so AI can answer from user data while keeping sensitive information off cloud AI providers. Styles those products with DCI-P3 color, fluid animation, and light and dark themes that hold across multiple viewports and can follow system settings. Uses Claude Code, Cursor, and Anti-Gravity every day and is skilled at gathering requirements from both technical and non-technical teams.

PROJECTS

MissionCtrl — Satellite mission simulator · missionctrl.org

Next.js 15 · TypeScript · Python · Three.js · Gemini API · Docker · Playwright

- Renders live satellite positions and orbital paths on a 3D globe from TLE data as the simulation clock advances.
- Gemini flight assistant answers questions about the current orbit, upcoming burns, and related mission topics.
- Playwright and unit tests run in GitHub Actions.

Valley Forge Automotive — Shop management system · valleyforgeautomotive.org

React · TypeScript · Firebase Auth · Firestore · Tailwind CSS

- Live service records, parts inventory, and scheduling on a live domain.
- Role checks in Firestore block customers and staff from each other's records and allows admins to see all.

Legal Eagle — Practice tools for estate attorneys

Next.js · TypeScript · PostgreSQL · FastAPI

- Tracks client files, filing deadlines, and a per-case change log.
- Assistant answers from app data only after names and other sensitive info is stripped

Stardust — Voice history and digital legacy

Next.js · React · Python · PostgreSQL · Docker · faster-whisper

- Records interviews, then transcribes and formats them for a local RAG index or custom model.
- Transcription runs faster-whisper on the host so audio never goes to a hosted API.

EXPERIENCE

AI Generalist Expert | *Mercor* Remote · Current

- Providing expertise in AI to improve models for a top AI lab.
